About Qvd

Qvd coin is a binary intelligent chain network based on IB ie ip-20 token, with reward mechanism. Establish a deflation mechanism. The pre-sale of qvd coins will start in August 2021. Qvd includes a variety of innovative mechanisms: holding qvd coins to distribute qvd rewards, automatic combustion system and automatic addition of heco exchange liquidity pool.

Qvd coins are completely dispersed. Its community is composed of blockchain enthusiasts. Promote every development and progress of the project through community governance. As a token issued by the project, qvd is the only certificate to participate in community governance, promote project development and obtain project value

Ecosystem

Qvd coin is a binary smart chain network based on bep-20 token, which will be issued in August 2021 and increase the liquidity of heco mdex. Dear investors, the maximum supply of qvd is 99999.

Dear qvd, 12% commission will be deducted for each transaction, including:

6% of each transaction will reward each dear qvd holder in the form of qvd, which can be obtained free of charge.

3% of each transaction will automatically flow into the mdex liquidity pool to provide transaction liquidity.

6% of each transaction will be sent to each currency holding address.

3% of each transaction will be deposited in the marketing wallet.

Distribution

IDO

- 45% of all supplies

ADDLP

- 45% supply will be locked in mdex (heco)

MARKETING

- 2% supply will include mdex fee development wallet

WALLET

- 3% supply will be locked for 1 year

AIRDORP

- 5% supply will be distributed after release

(total amount: 99999)

Investment Income

This is a very unique model, only done once. Every time someone buys or sells an expensive qvd, 6% of the qvd they buy or sell will be obtained and saved in the smart contract, and then distributed to all dear qvd holders.

3% of transactions will enter the liquidity pool, and the address of the liquidity pool will be permanently locked. At the same time, if the cardholder gets more than a certain peak reward, 12% of the funds will be used to buy expensive blocks at heco exchange and redistribute them. This will help reduce and raise prices. In addition: every time someone buys or sells expensive qvd, 3% of them will be burned and enter the marketing wallet.

Development Plan

The NFT market develops the NIFT function. Dear qvd holder pays dear qvd to generate an exclusive mask and stores it on iipif using standard ieirc721. NIFT revenue will be destroyed,

Equity development pledge mining function, pledge deal qvd to participate in mining and obtain deal qvd and other related currencies, which can not only obtain mining income, but also lock in a large number of circulation.

Ido develops Ido platform. All platform revenue is used for repurchase and destruction of dear qvd. It has the functions of public pool and white list. Holding dear qvd and participating in IDO can get more proportion and income
